In the paper filed 1/10/05, prior to addressing the rejections in the paper filed 3/17/04, applicants question the status of claims 89, 95-98. Claim 96, directed to porphyrins, is non-elected in view of the election of species requirement filed 10/10/01. Prior to addressing applicants' response to the rejections cited above, the status of claims 89, 95, 97, and 98 will be clarified upon applicants' response to the following election of species requirement:

Claims 22-24, 87-89, 95, 97, 98 are generic to a plurality of disclosed patentably distinct species comprising carbon nanofibrils with functional groups. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicants are advised that the claims recited are to be considered as one Markush group with respect to the various species recited. One ultimate species should be elected.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
